

MINI PROJECT ON POWER BI

Senghong SOEUNG

Project Background

ABC NGO plans to share its yearly report to other stakeholder through its website. It has several initiatives and indicators that need to be tracked and reported when new assessment is made. One of this initiatives is to oversee **Vulnerability Index** of a country. This program creates **4 Vulnerable indexes that each index has 4 statuses**. All data is collected at the commune level.

The 4 indexes are : **Storm Index, Flood Index, Drought Index, and Composite Index**

and the result from each commune of each index will be classified into:

-  High
-  Quite
-  Less
-  Least

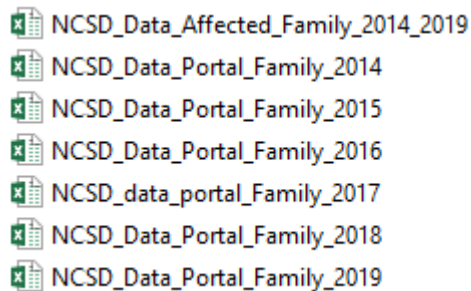

After inviting all potential IT Development team, all teams have proposed to deliver it solution as following:

- Report & Visualization: PowerBI
- Data Input Form : using (as decided by each team)

MINI – PROJECT PART 1

Data Source

The project owner wants to see the number of family affected by these VI index. So , it prepare more data set called : family affected by VI index in these files.

- NCSD_Data_Affected_Family_2014_2019
- NCSD_Data_Portal_Family_2014
- NCSD_Data_Portal_Family_2015
- NCSD_Data_Portal_Family_2016
- NCSD_data_portal_Family_2017
- NCSD_Data_Portal_Family_2018
- NCSD_Data_Portal_Family_2019
